Locket [Portrait of man with mustache, lock

of hair]

**Date**

c. 1900

**Primary Maker**

Unknown

**Medium**

locket: black metal case, 1 gelatin silver print, hair

**Description**

A portrait of a man with a mustache resides within a case covered in black material. This case also possesses a lock of hair; to whom the hair belonged to, remains unknown. The locket's exterior design is quite simple; the recto and verso covered in the same dark material. There is no top loop for a chain, therefore this would have most likely been a pocket piece, or a displayed piece of jewellery within a home.
