

Basic Detail Report

A sea canal is divided by primitive sluices in small washbasins. In these washbasins the water evaporates as a result of the southern heat in a short time and what is left are salt deposits. As soon as the salt washbasins are emptied, the sluices are open

Date

1930s

Primary Maker

Walter/Lueders Süßmann

Medium

gelatin silver print

Description

Klinsky Press Agency Collection

Dimensions

Overall: 17.3 x 24.2 cm (6 13/16 x 9 1/2 in.)
