Description

Giorgio La Malfa (born October 13, 1939) is an Italian politician. He served as secretary of the Italian Republican Party from 1987 to 1993, when he stood down and was indicted to face trial over a corruption scandal. Ugo La Malfa (May 16, 1903 – March 26, 1979) was an Italian politician, and an important leader in the Italian Republican Party, of which his son, Giorgio La Malfa, is now president. During the tumultuous 1970s, the Republican party played a small but vital role in determining the government of Italy and maintaining continuity. Following the fall of Mariano Rumor's third government in 1970, La Malfa refused the invitation of incoming Prime Minister Emilio Colombo to take the role of Minister of the Treasury. For him, the government was not in position to delineate a strategic plan for financing reforms with their education, health, and transportation services, and Colombo only lasted one year in the job. La Malfa pulled his party out of the subsequent Giulio Andreotti government over the issue of state control of cable television. Pietro Armani (Rome , 28 February 1931 - Rome , 23 June 2009) was an Italian politician.
