## Homeless in Salaparuta after the Belice

### earthquake in Sicily, 1968

#### Date

1968-1969

#### Medium

gelatin silver print

#### Description

The 1968 Belice earthquake sequence took place in Sicily between 14 and 15 January. The largest shock measured 5.5 on the moment magnitude scale, with five others of magnitude 5+. The maximum perceived intensity was X (Intense) on the Mercalli intensity scale. The earthquake sequence, centred between the towns of Gibellina, Salaparuta and Poggioreale, killed at least 231 people, possibly more than 400, with between 632 and about 1000 injured and left 100,000 homeless. It is known in Italy as Terremoto del Belice. In 1968 the original site of the town was near epicentre of the Belice Valley earthquake. As a result, Salaparuta was completely destroyed and rebuilt not far from the original location. The current Salaparuta is still home to many of the citizens of the old town.

#### Dimensions

Overall: 30.2 x 21.4 cm (11 7/8 x 8 3/8 in.)
